

Transfer Cars

Custom Cars for Your
Material Moving Needs

Transfer cars have been the cornerstone of Brilex Technical Solutions' material handling equipment portfolio for over 30 years. Each of our transfer cars are custom designed to suit your shop's material moving needs and built to withstand the test of time. We maintain stringent design requirements to ensure consistent quality, safety, robustness, and reliability in every project. And with our exclusive manufacturing partnership with Brilex Industries, we are able to keep the entire process – from concept to delivery – all under one roof, right here in the USA. Our transfer car offerings include:

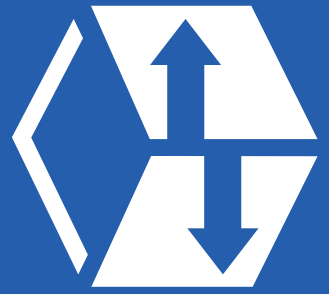

- ◆ **SINGLE AND MULTIPLE COIL CARS**
- ◆ **SCRAP BUCKET CARS**
- ◆ **CONVENTIONAL LADLE TRANSFER CARS FOR LMF & EAF AREAS**
- ◆ **TILTING LADLE CARS AT POUR AND LADLE CLEAN OUT STATIONS**
- ◆ **FREE RANGING CARS**
- ◆ **TUNDISH CARS**
- ◆ **WEIGHING CARS**
- ◆ **FLAT TOP CARS**
- ◆ **SPECIALTY ONE OFF TRANSFER CARS**
- ◆ **AND MORE**

**PROUDLY
MANUFACTURED
USA**

Completely Customized, Every Time.

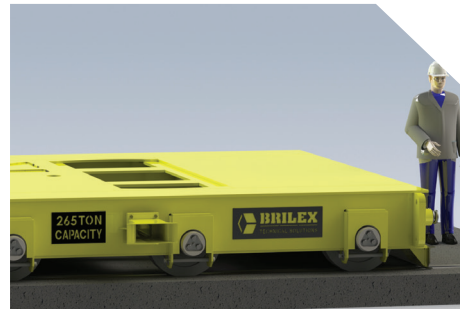

Each of our transfer cars are completely customized to meet our customer's metal moving needs. Customization can depend on factors such as...

- ◆ WIDTH
- ◆ CARRYING CAPACITY
- ◆ OVERALL FOOTPRINT
- ◆ MATERIAL
- ◆ HEIGHT
- ◆ SUPPORTS NEEDED
- ◆ WHEEL CONFIGURATION

COIL CARS

We can design a coil car that minimizes coil damage while transferring coils between bays from a single saddle car to as many saddles as you need.

FLAT TOP CARS

Flat top transfer cars are designed to hold and transport steel plates or similar components around the shop floor.

SCRAP CARS

Our scrap transfer cars can support a wide range of scrap bucket designs. We have a suitable hard-working car for you from clamshell-style to dumping and any capacity you need.

LADLE TILTING CARS

These rail-mounted Transfer Cars support and transfer ladles and slag pots to and from a pouring, skimming, or clean-out station. They can then tilt the vessel while remaining in the car to help assist you in your process.

LADLE CARS

Our Ladle Transfer Cars are rugged and able to handle any capacity. They can also include stirring seats, weigh systems, suspension, and slip stands, amongst many other features.

FREE RANGING CARS

Free from the constrictions of a track, these free-roaming cars are designed to freely move about your shop with the help of molded high-strength poly or rubber tires.

BRILEX INDUSTRIES: Our exclusive partnership with Brilex Industries for in-house manufacturing of all of our equipment creates a powerhouse synergy that results in the highest quality equipment engineered to your specifications and specializations.
